

Education

Bachelor of Science in Language and International Health
Clemson University Honors College
Emphasis: French (Advanced)

May 2025
Clemson, SC
GPA: 3.86/4.00

Relevant Experience

Patient Care Volunteer

June 2024-Present

Caris Hospice

- Conduct compassionate conversations with hospice patients to lift morale and establish trust, refining communication and patient rapport-building skills
- Collaborate with volunteer coordinators to design community events, like senior fairs, enhancing resident engagement and well-being through supportive initiatives

Research Student

August 2024-Present

Healthcare Logistics: Industrial Engineering

- Analyze literature reviews on radiology and emergency department efficiencies to identify barriers to patient care, such as CT imaging bottlenecks
- Partner with Prisma Health at Greenville Memorial Hospital to redesign workflows to improve patient flow, gaining direct insights from healthcare providers on clinical practices
- Observe and communicate with emergency department staff, gathering critical information on department operations to support data-driven improvements

Medical Intern

March 2024-May 2024

Poste de Sante de Charles Foucauld

- Supported patient care by scribing and taking daily vital signs, fostering patient connections and gaining hands-on experience in direct patient interaction
- Shadowed physicians in a busy community clinic in Dakar, Senegal, developing a cross-cultural understanding of patient care
- Communicated with patients and staff in French, further strengthening cultural and linguistic competencies relevant to diverse healthcare environments

Leadership Experience

Clemson University Tutor Mentor

January 2022-Present

Academic Success Center

- Provide tutoring in Chemistry, French, and Statistics, emphasizing communication and adaptability to meet each student's learning style
- Mentor and coach new student tutors, cultivating skills in teaching, communication, and peer support within an academic setting

Community Health Surveillance Project Manager

August 2022- December 2023

Clemson Engineers for Developing Communities

- Managed a community hypertension monitoring project in Cange, Haiti, involving close collaboration with local healthcare providers
- Collected and analyzed health data, contributing to systematic improvements in tracking community health metrics
- Facilitated team meetings and stakeholder communications to ensure project goals were met and community health initiatives were effectively implemented
